

SAMRAT CHAUHAN

Software Engineer | Full Stack • AI • Automation

+91 7668795490 | chauhansamrat835@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

Computer Science (AI & ML) student at Meerut Institute of Engineering and Technology (MIET) passionate about building software at the intersection of **Full Stack Development**, **AI**, and **Automation**. I enjoy designing scalable systems, developing AI-powered applications, and creating developer tools using technologies like **React**, **TypeScript**, **FastAPI**, **Node.js**, and **LangGraph**. Always eager to learn, collaborate, and build products that make a real impact.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST APIs

Databases: MongoDB, Firebase, PostgreSQL, Prisma ORM

AI Technologies: LangChain, LangGraph, RAG, Vector Databases

Tools: Git, GitHub, Docker, Postman, VS Code, n8n

Projects

Educatory CMS | React.js, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS Aug 2026

- Engineered a full-stack Course Management System featuring secure role-based access control (RBAC) for Admins, Faculty, and Students using stateless JWT authentication and HTTP-only cookies.
- Developed a modular REST API with Node.js and Express, implementing strict request validation with Zod and centralized error handling to ensure system reliability.
- Designed a relational PostgreSQL database schema managed via Prisma ORM, strictly enforcing data integrity for course ownership and faculty assignments.
- Built a responsive single-page application using React 19 and Tailwind CSS, integrating role-scoped dashboard statistics and a centralized Axios API client.
- Automated administrative workflows using an n8n-powered Telegram bot, enabling conversational course creation by communicating directly with the deployed REST API.
- GitHub:** [GitHub](#) | **Deployment:** [educatory-cms](#)

Jury Ai | React Native, React.js, FastAPI, LangGraph, RAG May 2026

- Developed responsive mobile and web interfaces using **React Native** and **React.js** with reusable UI components and modular architecture.
- Integrated React frontend with **FastAPI REST APIs** to deliver AI-powered legal assistance with structured response rendering.
- Designed an intuitive chat interface featuring markdown rendering, conversation history, and persistent local storage for a seamless user experience.
- Built a shared frontend architecture supporting both mobile and web applications while maintaining consistent UI and functionality.
- GitHub:** [GitHub](#) | **Deployment:** [jury-ai](#)

Leet'O Tracker AI | React.js, FastAPI, PostgreSQL, LangGraph, n8n Mar 2026

- Built a responsive analytics platform using **React.js** to track coding progress across **4+ performance dimensions**, including problem-solving progress, contest history, revision activity, and performance trends.
- Integrated **FastAPI REST APIs** with AI workflows to generate personalized learning insights and interview-preparation recommendations from coding performance data.
- Developed reusable dashboard components for **5+ analytics and tracking workflows**, including progress visualization, performance analysis, revision scheduling, and interactive reports.
- Automated performance logging and report generation using **n8n**, reducing repetitive manual reporting and creating a consistent analytics pipeline.
- GitHub:** [GitHub](#) | **Deployment:** [leetotracker](#)

Hackathons & Achievements

TRIKON 3.0 Hackathon | n8n Automation Apr 2026

- Led a team in building an AI-powered application within a 36-hour hackathon, securing a position among the **Top 10** out of 350+ participating teams.

Cognizant Technoverse 2026 | Hackathon Participant, React.js May 2026

- Collaborated in a four-member team to design and develop a software solution for real-world business challenges under strict development timelines.
