

SAMRAT CHAUHAN

Software Engineer | Full Stack • AI • Automation

+91 7668795490 | chauhansamrat835@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

Computer Science (AI & ML) student passionate about building practical software at the intersection of **Full Stack Development**, **AI**, and **Automation**. I specialize in designing scalable architectures, developing AI-powered workflows, and creating open-source developer tools that solve real-world engineering problems and drive measurable impact.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS

Backend: FastAPI, Node.js, Express.js, REST APIs

Databases: MongoDB, Firebase, PostgreSQL, Prisma ORM

AI Technologies: LangChain, LangGraph, RAG, Vector Databases

Tools: Git, GitHub, Docker, Postman, Playwright, n8n

Projects

GitStream | TypeScript, Vitest, GitHub REST API, TS Compiler API **Jul 2026 – Present**

- Identified the need to eliminate local development setup barriers for GitHub repositories by engineering an open-source browser-native execution engine.
- Designed a modular TypeScript monorepo featuring an in-memory Virtual File System that supports over 10 file operations, enabling highly scalable client-side repository management.
- Built a static analyzer pipeline leveraging the TypeScript Compiler API to extract source-code constructs, facilitating robust dependency resolution and preparing code for browser-based execution.
- GitHub:** [GitHub](#)

Educatory CMS | React.js, Node.js, Express, PostgreSQL, Prisma, Tailwind CSS **Aug 2026**

- Resolved decentralized course access by engineering a full-stack Course Management System with strict role-based access control (RBAC) for Admins, Faculty, and Students.
- Implemented a secure Node.js and Express backend using stateless JWT authentication with HTTP-only cookies, combined with Zod for strict request validation.
- Designed a relational PostgreSQL database schema managed via Prisma ORM to strictly enforce data integrity for course ownership and faculty assignments.
- GitHub:** [GitHub](#) | **Deployment:** [educatory-cms](#)

JobHunter AI | Python, FastAPI, Playwright, Groq LLMs, n8n **Jul 2026**

- Tackled fragmented hiring portals by developing an automated job aggregation platform that searches and normalizes listings from multiple platforms including Wellfound and Naukri.
- Integrated Groq LLMs to generate ATS compatibility scores and orchestrated Playwright with n8n to automatically submit applications for the most relevant roles.
- Built a FastAPI backend connected to a Google Sheets database to effectively manage candidate queues, remove duplicates, and filter out stale job listings.
- GitHub:** [GitHub](#)

SalesBot.AI | Python, FastAPI, LangGraph, LangChain, Firestore **Apr 2026**

- Addressed the need for data-driven sales decisions by designing a multi-agent sales intelligence chatbot utilizing LangGraph and Groq.
- Engineered specialized AI agents via a FastAPI backend to analyze daily visits, prioritize follow-ups, and review weekly performance.
- Grounded LLM responses in real-time sales data through seamless Firestore integration, employing strict guardrails to prevent AI hallucinations on unsupported topics.
- GitHub:** [GitHub](#)

Jury Ai | React Native, React.js, FastAPI, LangGraph, RAG **Mar 2026**

- Aimed to deliver reliable legal guidance by building a cross-platform application with React Native and React for country-aware and comparative legal queries.
- Integrated a Python-based RAG system and LangGraph via FastAPI to process queries, yielding structured responses detailing legality, risk levels, and actionable advice.
- Engineered a chat interface utilizing Zustand for state management and local storage for persistent chat history, ensuring a seamless user experience.
- GitHub:** [GitHub](#) | **Deployment:** [jury-ai](#)

Leet'O Tracker AI | React.js, FastAPI, PostgreSQL, LangGraph, n8n

Feb 2026

- Addressed unstructured coding practice by developing a full-stack analytics platform that tracks LeetCode activity and historical performance trends.
- Architected a FastAPI backend integrating Groq LLMs and LangGraph to generate structured revision plans and route queries to an interactive AI mentor.
- Automated the entire feedback loop using n8n workflows and PostgreSQL, effectively delivering scheduled email reports to users without manual effort.
- **GitHub:** [GitHub](#) | **Deployment:** [leetotracker](#)

Education

Meerut Institute of Engineering and Technology (MIET) | Meerut, UP

2023 – 2027

- **Degree:** B.Tech in Computer Science and Engineering (AI & ML)
- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, Database Systems, Computer Networks, AI, Machine Learning.

Hackathons & Achievements

TRIKON 3.0 Hackathon | n8n Automation

Apr 2026

- Led a team in building an AI-powered application within a 28-hour hackathon, securing a position among the **Top 10** out of 350+ participating teams.

Cognizant Technoverse 2026 | Hackathon Participant, React.js

May 2026

- Collaborated in a four-member team to design and develop a software solution for real-world business challenges under strict development timelines.
